

Texas AIPG Membership Employment Interest Survey - 2016

AIPG Texas Section Members:

The purpose of this short survey is for the AIPG Texas Board to learn if there are areas where we can help members locate information and courses online as well as other educational opportunities that would be beneficial in your career development and, for those of you out of work, to assist you to find employment.

We are also interested in where you would like to work and the kind of information that you could use to achieve your professional goals beyond those currently provided by the AIPG Texas Section.

The survey shouldn't require more than a few minutes of your time.

We welcome your feedback and suggestions.

1. - Identify the Top 3 Areas you Would Like to Know More About in order to be More Employable:

- Petroleum Geology** - Principally concerned with the evaluation of seven key elements applicable in the search for hydrocarbons: source, reservoir, seal, trap, timing, maturation and migration.
- Unconventional Hydrocarbon Resources** - Distribution and production of oil and gas from shale (fracking) and gas from coal bed methane. Unconventional hydrocarbon deposits are very diverse and difficult to characterize overall, but in general are often lower in resource concentration, dispersed over large areas, and require well stimulation or additional extraction or conversion technology.
- Mineral Exploration and Development** - Mineral exploration and development are investigative activities prior to mining. They are investments. As such, companies spend money today in the expectation that future revenues will be sufficient to cover all costs including a minimum acceptable profit.
- Hydrogeology / Groundwater Resource Evaluation** - Groundwater quantity and availability issues. Before water resources can be developed and managed, they must be evaluated, i.e., what proportion of those resources can be sustainably exploited for various uses, after setting aside a proportion for environmental or ecological needs. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics to practice in Texas.
- Groundwater Contamination and Remediation** - Professionals must understand the physical, chemical, and biological processes that control contaminant transport in groundwater and be able to design plans for stabilization or removal of the contaminant plume. Requires knowledge of applicable regulatory issues. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics to practice in Texas.
- Engineering Geology** - A combination of geology and geotechnical engineering that is used in structure design and failure analysis issues. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics/Soils to practice in Texas.
- Geological Service Business Ownership and Management** - A person or company that pays people to work for them as salaried, contracted or subcontracted employees. Positive attributes include: a strong work ethic, project experience, leadership skills, a risk-taking mentality, a strong desire to survive, a source of cash, an ability to understand markets and develop business, an understanding of budgets and cash flow, familiarity with income statements and balance sheets, effectiveness in finding and retaining good employees, and, if married, a supportive spouse.

Other (please specify)

2. - At What Kind of Entity Would You Prefer to Work?

- Government services
- Non -profit / non-governmental organization
- Small, private company
- Multinational company
- Academia - college, high school, grade school

Other (please specify)

3. - Where in the World Would You Prefer to Work?

- Western USA
- Southern USA (includes Texas)
- Northern USA
- Eastern USA
- Alaska
- Canada
- Europe / Great Britain
- Africa
- Asia
- Australia
- South America

Other (please specify)

4. - If You Want to Work in Texas, Would You Prefer:

- Major city
- Smaller metropolitan area
- Rural location

Other (please specify)

5. - Does the AIPG National Jobs Webpage Provide Adequate Information to Conduct your Search for Employment?

- Yes, it is of great help.
- No, it is of little or no help.

Other (please specify)

6. - Do the AIPG Texas Section's Resources Webpages Provide Useful Information in Support for you Finding Employment?

- They are very useful.
- They are somewhat useful.
- I am providing additional ideas in the Comment Box below:

Other (please specify)

7. - Do the AIPG Texas Section's Continuing Education Webpages Assist you in Maintaining your Professional License(s)

- To Some Extent. I could use additional resources.
- This CE information is very useful.
- I am adding additional information via the Comments box below:

Other (please specify)

8. - Do you have your Professional License to Practice Geoscience in Texas?

- Yes
- No, but do wish to obtain your Texas Professional License to practice geoscience in the State?
- Do you wish to receive assistance in preparing for the two qualifying examinations?

Other (please specify)

9. - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. For the top three technical areas of interest, the Board will identify available online courses including AIPG courses. For example, a new on-line course of potential interest to geoscientists was recently announced by Rice University.

If no acceptable online courses are available for the top three technical areas, the Texas AIPG board will consider expanding our on-line search for you or we will look into preparing workshops or webinars to be held in the major centers of our Texas membership, Houston, Dallas, Austin, and San Antonio.

Thank you for your feedback!

Doug Hall

Chair

Geology Business and Training Committee

Q2: - At What Kind of Entity Would You Prefer to Work?

Small, private company, Multinational company, Academia - college, high school, grade school

Q3: - Where in the World Would You Prefer to Work?

Western USA, Southern USA (includes Texas), Northern USA, Canada, Europe / Great Britain, Australia, South America

Q4: - If You Want to Work in Texas, Would You Prefer:

Major city, Smaller metropolitan area

Q5: - Does the AIPG National Jobs Webpage Provide Adequate Information to Conduct your Search for Employment?

Other (please specify) I have not checked it out yet

Q6: - Do the AIPG Texas Section's Resources Webpages Provide Useful Information in Support for you Finding Employment?

I am providing additional ideas in the Comment Box below:

,

Other (please specify) I haven't checked it out

Q7: - Do the AIPG Texas Section's Continuing Education Webpages Assist you in Maintaining your Professional License(s)

I am adding additional information via the Comments box below:

,

Other (please specify) Haven't looked

Q8: - Do you have your Professional License to Practice Geoscience in Texas?

No, but do wish to obtain your Texas Professional License to practice geoscience in the State?

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. For the top three technical areas of interest, the Board will identify available online courses including AIPG courses. For example, a new on-line course of potential interest to geoscientists was recently announced by Rice University. If no acceptable online courses are available for the top three technical areas, the Texas AIPG board will consider expanding our on-line search for you or we will look into preparing workshops or webinars to be held in the major centers of our Texas membership, Houston, Dallas, Austin, and San Antonio.

Q1: - Identify the Top 3 Areas you Would Like to Know More About in order to be More Employable:

Petroleum Geology - Principally concerned with the evaluation of seven key elements applicable in the search for hydrocarbons: source, reservoir, seal, trap, timing, maturation and migration.

Unconventional Hydrocarbon Resources - Distribution and production of oil and gas from shale (fracking) and gas from coal bed methane. Unconventional hydrocarbon deposits are very diverse and difficult to characterize overall, but in general are often lower in resource concentration, dispersed over large areas, and require well stimulation or additional extraction or conversion technology.

Geological Service Business Ownership and Management - A person or company that pays people to work for them as salaried, contracted or subcontracted employees. Positive attributes include: a strong work ethic, project experience, leadership skills, a risk-taking mentality, a strong desire to survive, a source of cash, an ability to understand markets and develop business, an understanding of budgets and cash flow, familiarity with income statements and balance sheets, effectiveness in finding and retaining good employees, and, if married, a supportive spouse.

Q2: - At What Kind of Entity Would You Prefer to Work?

Other (please specify) Consultancy

Q3: - Where in the World Would You Prefer to Work?

Other (please specify)
international consultant based in US

Q4: - If You Want to Work in Texas, Would You Prefer:

Smaller metropolitan area

Q5: - Does the AIPG National Jobs Webpage Provide Adequate Information to Conduct your Search for Employment?

Other (please specify) Never looked

Q6: - Do the AIPG Texas Section's Resources Webpages Provide Useful Information in Support for you Finding Employment?

I am providing additional ideas in the Comment Box below:

Other (please specify) Never looked

Q7: - Do the AIPG Texas Section's Continuing Education Webpages Assist you in Maintaining your Professional License(s)

Other (please specify) Never looked

Q8: - Do you have your Professional License to Practice Geoscience in Texas?

No, but do wish to obtain your Texas Professional License to practice geoscience in the State?

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. Groundwater Contamination and Remediation - Professionals must understand the physical, chemical, and biological processes that control contaminant transport in groundwater and be able to design plans for stabilization or removal of the contaminant plume. Requires knowledge of applicable regulatory issues. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics to practice in Texas.

Geological Service Business Ownership and Management - A person or company that pays people to work for them as salaried, contracted or subcontracted employees. Positive attributes include: a strong work ethic, project experience, leadership skills, a risk-taking mentality, a strong desire to survive, a source of cash, an ability to understand markets and develop business, an understanding of budgets and cash flow, familiarity with income statements and balance sheets, effectiveness in finding and retaining good employees, and, if married, a supportive spouse.

Q2: - At What Kind of Entity Would You Prefer to Work?

Non -profit / non-governmental organization ,
 Academia - college, high school, grade school

Q3: - Where in the World Would You Prefer to Work?

Southern USA (includes Texas), Canada,
 Europe / Great Britain

Q4: - If You Want to Work in Texas, Would You Prefer:

Smaller metropolitan area, Rural location

PAGE 1: AIPG Texas Section Members:

Q1: - Identify the Top 3 Areas you Would Like to Know More About in order to be More Employable:

Petroleum Geology - Principally concerned with the evaluation of seven key elements applicable in the search for hydrocarbons: source, reservoir, seal, trap, timing, maturation and migration.

Hydrogeology / Groundwater Resource Evaluation - Groundwater quantity and availability issues. Before water resources can be developed and managed, they must be evaluated, i.e., what proportion of those resources can be sustainably exploited for various uses, after setting aside a proportion for environmental or ecological needs. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics to practice in Texas.

Groundwater Contamination and Remediation - Professionals must understand the physical, chemical, and biological processes that control contaminant transport in groundwater and be able to design plans for stabilization or removal of the contaminant plume. Requires knowledge of applicable regulatory issues. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics to practice in Texas.

Q2: - At What Kind of Entity Would You Prefer to Work?

Non -profit / non-governmental organization ,
 Small, private company, Multinational company

Q3: - Where in the World Would You Prefer to Work?

Western USA, Southern USA (includes Texas) ,
 Eastern USA, Alaska, Canada,
 Europe / Great Britain , Africa, Asia, Australia,
 South America

Q4: - If You Want to Work in Texas, Would You Prefer:

Major city

Q5: - Does the AIPG National Jobs Webpage Provide Adequate Information to Conduct your Search for Employment?

Yes, it is of great help.

Q8: - Do you have your Professional License to Practice Geoscience in Texas?

No, but do wish to obtain your Texas Professional License to practice geoscience in the State?

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. For the top three technical areas of interest, the Board will identify available online courses including AIPG courses. For example, a new on-line course of potential interest to geoscientists was recently announced by Rice University. If no acceptable online courses are available for the top three technical areas, the Texas AIPG board will consider expanding our on-line search for you or we will look into preparing workshops or webinars to be held in the major centers of our Texas membership, Houston, Dallas, Austin, and San Antonio.

Thank you for your feedback! Doug

PAGE 1: AIPG Texas Section Members:

Q1: - Identify the Top 3 Areas you Would Like to Know More About in order to be More Employable:

Petroleum Geology - Principally concerned with the evaluation of seven key elements applicable in the search for hydrocarbons: source, reservoir, seal, trap, timing, maturation and migration.

Unconventional Hydrocarbon Resources - Distribution and production of oil and gas from shale (fracking) and gas from coal bed methane. Unconventional hydrocarbon deposits are very diverse and difficult to characterize overall, but in general are often lower in resource concentration, dispersed over large areas, and require well stimulation or additional extraction or conversion technology.

Mineral Exploration and Development - Mineral exploration and development are investigative activities prior to mining. They are investments. As such, companies spend money today in the expectation that future revenues will be sufficient to cover all costs including a minimum acceptable profit.

Q2: - At What Kind of Entity Would You Prefer to Work?

Small, private company,
Other (please specify)
Contract consulting: I've retired from full-time salaried work, but want to continue contributing as needed.

Q3: - Where in the World Would You Prefer to Work?

Southern USA (includes Texas), Asia,
South America,
Other (please specify)
My particular expertise is in terrestrial remote sensing. I want to work where this will contribute the most.

Q4: - If You Want to Work in Texas, Would You Prefer:

Major city,
Other (please specify)
I live in San Antonio, and don't plan to re-locate, but will travel.

Q5: - Does the AIPG National Jobs Webpage Provide Adequate Information to Conduct your Search for Employment?

Respondent skipped this question

Q6: - Do the AIPG Texas Section's Resources Webpages Provide Useful Information in Support for you Finding Employment?

They are somewhat useful.

Q7: - Do the AIPG Texas Section's Continuing Education Webpages Assist you in Maintaining your Professional License(s)

To Some Extent. I could use additional resources.

Q8: - Do you have your Professional License to Practice Geoscience in Texas?

No, but do wish to obtain your Texas Professional License to practice geoscience in the State?

Other (please specify) If it is worth the effort.

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. For the top three technical areas of interest, the Board will identify available online courses including AIPG courses. For example, a new on-line course of potential interest to geoscientists was recently announced by Rice University. If no acceptable online courses are available for the top three technical areas, the Texas AIPG board will consider expanding our on-line search for you or we will look into preparing workshops or webinars to be held in the major centers of our Texas membership, Houston, Dallas, Austin, and San Antonio.

Hydrogeology / Groundwater Resource Evaluation - Groundwater quantity and availability issues. Before water resources can be developed and managed, they must be evaluated, i.e., what proportion of those resources can be sustainably exploited for various uses, after setting aside a proportion for environmental or ecological needs. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics to practice in Texas.

Engineering Geology - A combination of geology and geotechnical engineering that is used in structure design and failure analysis issues. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics/Soils to practice in Texas.

Q2: - At What Kind of Entity Would You Prefer to Work?

Small, private company

Q3: - Where in the World Would You Prefer to Work?

Southern USA (includes Texas)

Q4: - If You Want to Work in Texas, Would You Prefer:

Rural location

Q5: - Does the AIPG National Jobs Webpage Provide Adequate Information to Conduct your Search for Employment?

Yes, it is of great help.

Q6: - Do the AIPG Texas Section's Resources Webpages Provide Useful Information in Support for you Finding Employment?

They are somewhat useful.

Q7: - Do the AIPG Texas Section's Continuing Education Webpages Assist you in Maintaining your Professional License(s)

To Some Extent. I could use additional resources.

Q8: - Do you have your Professional License to Practice Geoscience in Texas?

Yes

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. For the top three technical areas of interest, the Board will identify available online courses including AIPG courses. For example, a new on-line course of potential interest to geoscientists was recently announced by Rice University. If no acceptable online courses are available for the top three technical areas, the Texas AIPG board will consider expanding our on-line search for you or we will look into preparing workshops or webinars to be held in the major centers of our Texas membership, Houston, Dallas, Austin, and San Antonio.

Q1: - Identify the Top 3 Areas you Would Like to Know More About in order to be More Employable:

Hydrogeology / Groundwater Resource Evaluation - Groundwater quantity and availability issues. Before water resources can be developed and managed, they must be evaluated, i.e., what proportion of those resources can be sustainably exploited for various uses, after setting aside a proportion for environmental or ecological needs. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics to practice in Texas.

Groundwater Contamination and Remediation - Professionals must understand the physical, chemical, and biological processes that control contaminant transport in groundwater and be able to design plans for stabilization or removal of the contaminant plume. Requires knowledge of applicable regulatory issues. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics to practice in Texas.

Engineering Geology - A combination of geology and geotechnical engineering that is used in structure design and failure analysis issues. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics/Soils to practice in Texas.

Q2: - At What Kind of Entity Would You Prefer to Work?

Government services , Small, private company,
Multinational company

Q3: - Where in the World Would You Prefer to Work?

Western USA, Southern USA (includes Texas),
Northern USA, Eastern USA

Q4: - If You Want to Work in Texas, Would You Prefer:

Major city, Smaller metropolitan area

Q5: - Does the AIPG National Jobs Webpage Provide Adequate Information to Conduct your Search for Employment?

Respondent skipped this question

Q6: - Do the AIPG Texas Section's Resources Webpages Provide Useful Information in Support for you Finding Employment?

Respondent skipped this question

Q7: - Do the AIPG Texas Section's Continuing Education Webpages Assist you in Maintaining your Professional License(s)

Respondent skipped this question

Q8: - Do you have your Professional License to Practice Geoscience in Texas?

No, but do wish to obtain your Texas Professional License to practice geoscience in the State?

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. For the top three technical areas of interest, the Board will identify available online courses including AIPG courses. For example, a new on-line course of potential interest to geoscientists was recently announced by Rice University. Q1: - Identify the Top 3 Areas you Would Like to Know More About in order to be More Employable:

Petroleum Geology - Principally concerned with the evaluation of seven key elements applicable in the search for hydrocarbons: source, reservoir, seal, trap, timing, maturation and migration.

,

Unconventional Hydrocarbon Resources - Distribution and production of oil and gas from shale (fracking) and gas from coal bed methane. Unconventional hydrocarbon deposits are very diverse and difficult to characterize overall, but in general are often lower in resource concentration, dispersed over large areas, and require well stimulation or additional extraction or conversion technology.

Q2: - At What Kind of Entity Would You Prefer to Work?

Small, private company

PAGE 1: AIPG Texas Section Members:

Q1: - Identify the Top 3 Areas you Would Like to Know More About in order to be More Employable:

Petroleum Geology - Principally concerned with the evaluation of seven key elements applicable in the search for hydrocarbons: source, reservoir, seal, trap, timing, maturation and migration.

Unconventional Hydrocarbon Resources - Distribution and production of oil and gas from shale (fracking) and gas from coal bed methane. Unconventional hydrocarbon deposits are very diverse and difficult to characterize overall, but in general are often lower in resource concentration, dispersed over large areas, and require well stimulation or additional extraction or conversion technology.

Groundwater Contamination and Remediation - Professionals must understand the physical, chemical, and biological processes that control contaminant transport in groundwater and be able to design plans for stabilization or removal of the contaminant plume. Requires knowledge of applicable regulatory issues. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics to practice in Texas.

Q2: - At What Kind of Entity Would You Prefer to Work?

Academia - college, high school, grade school

Q3: - Where in the World Would You Prefer to Work?

Western USA, Southern USA (includes Texas)

Q4: - If You Want to Work in Texas, Would You Prefer:

Major city, Smaller metropolitan area

Q5: - Does the AIPG National Jobs Webpage Provide Adequate Information to Conduct your Search for Employment?

Yes, it is of great help.

Q6: - Do the AIPG Texas Section's Resources Webpages Provide Useful Information in Support for you Finding Employment?

They are somewhat useful.

Q7: - Do the AIPG Texas Section's Continuing Education Webpages Assist you in Maintaining your Professional License(s)

To Some Extent. I could use additional resources.

Q8: - Do you have your Professional License to Practice Geoscience in Texas?

Do you wish to receive assistance in preparing for the two qualifying examinations?

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. For the top three technical areas of interest, the Board will identify available online courses including AIPG courses. For example, a new on-line course of potential interest to geoscientists was recently announced by Rice University. Q1: - Identify the Top 3 Areas you Would Like to Know More About in order to be More Employable:

Hydrogeology / Groundwater Resource Evaluation - Groundwater quantity and availability issues. Before water resources can be developed and managed, they must be evaluated, i.e., what proportion of those resources can be sustainably exploited for various uses, after setting aside a proportion for environmental or ecological needs. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics to practice in Texas.

Groundwater Contamination and Remediation - Professionals must understand the physical, chemical, and biological processes that control contaminant transport in groundwater and be able to design plans for stabilization or removal of the contaminant plume. Requires knowledge of applicable regulatory issues. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics to practice in Texas.

Engineering Geology - A combination of geology and geotechnical engineering that is used in structure design and failure analysis issues. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics/Soils to practice in Texas.

Q2: - At What Kind of Entity Would You Prefer to Work?

Small, private company

Q3: - Where in the World Would You Prefer to Work?

Eastern USA

Q4: - If You Want to Work in Texas, Would You Prefer:

Rural location

Q5: - Does the AIPG National Jobs Webpage Provide Adequate Information to Conduct your Search for Employment?

No, it is of little or no help.

Q6: - Do the AIPG Texas Section's Resources Webpages Provide Useful Information in Support for you Finding Employment?

They are somewhat useful.

Q7: - Do the AIPG Texas Section's Continuing Education Webpages Assist you in Maintaining your Professional License(s)

To Some Extent. I could use additional resources. ,
This CE information is very useful.

Q8: - Do you have your Professional License to Practice Geoscience in Texas?

Yes

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. Petroleum Geology - Principally concerned with the evaluation of seven key elements applicable in the search for hydrocarbons: source, reservoir, seal, trap, timing, maturation and migration.

Unconventional Hydrocarbon Resources - Distribution and production of oil and gas from shale (fracking) and gas from coal bed methane. Unconventional hydrocarbon deposits are very diverse and difficult to characterize overall, but in general are often lower in resource concentration, dispersed over large areas, and require well stimulation or additional extraction or conversion technology.

Engineering Geology - A combination of geology and geotechnical engineering that is used in structure design and failure analysis issues. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics/Soils to practice in Texas.

Q2: - At What Kind of Entity Would You Prefer to Work?

Government services

Q3: - Where in the World Would You Prefer to Work?

Western USA

Q4: - If You Want to Work in Texas, Would You Prefer:

Smaller metropolitan area

Q5: - Does the AIPG National Jobs Webpage Provide Adequate Information to Conduct your Search for Employment?

Yes, it is of great help.

Q6: - Do the AIPG Texas Section's Resources Webpages Provide Useful Information in Support for you Finding Employment?

They are very useful.

Q7: - Do the AIPG Texas Section's Continuing Education Webpages Assist you in Maintaining your Professional License(s)

This CE information is very useful.

Q8: - Do you have your Professional License to Practice Geoscience in Texas?

Yes

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. For the top three technical areas of interest, the Board will identify available online courses including AIPG courses. For example, a new on-line course of potential interest to geoscientists was recently announced by Rice University. If no acceptable online courses are available for the top three technical areas, the Texas AIPG board will consider expanding our on-line search for you or we will look into preparing workshops or webinars to be held in the major centers of our Texas membership, Houston, Dallas, Austin, and San Antonio.

Thank you for your feedback! Doug

Q1: - Identify the Top 3 Areas you Would Like to Know More About in order to be More Employable:

Mineral Exploration and Development - Mineral exploration and development are investigative activities prior to mining. They are investments. As such, companies spend money today in the expectation that future revenues will be sufficient to cover all costs including a minimum acceptable profit.

Hydrogeology / Groundwater Resource Evaluation - Groundwater quantity and availability issues. Before water resources can be developed and managed, they must be evaluated, i.e., what proportion of those resources can be sustainably exploited for various uses, after setting aside a proportion for environmental or ecological needs. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics to practice in Texas.

Groundwater Contamination and Remediation - Professionals must understand the physical, chemical, and biological processes that control contaminant transport in groundwater and be able to design plans for stabilization or removal of the contaminant plume. Requires knowledge of applicable regulatory issues. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics to practice in Texas.

Q2: - At What Kind of Entity Would You Prefer to Work?

Government services , Multinational company

Q3: - Where in the World Would You Prefer to Work?

Western USA, Southern USA (includes Texas) ,
Eastern USA, Europe / Great Britain , Australia,
South America

Q4: - If You Want to Work in Texas, Would You Prefer:

Major city, Smaller metropolitan area

Q5: - Does the AIPG National Jobs Webpage Provide Adequate Information to Conduct your Search for Employment?

Other (please specify) I have not used the webpage.

Q6: - Do the AIPG Texas Section's Resources Webpages Provide Useful Information in Support for you Finding Employment?

They are somewhat useful.

Q7: - Do the AIPG Texas Section's Continuing Education Webpages Assist you In Maintaining your Professional License(s)

This CE information is very useful.

Q8: - Do you have your Professional License to Practice Geoscience in Texas?

No, but do wish to obtain your Texas Professional License to practice geoscience in the State?

Do you wish to receive assistance in preparing for the two qualifying examinations?

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. For the top three technical areas of interest, the Board will identify available online courses including AIPG courses. Q2: - At What Kind of Entity Would You Prefer to Work?

Small, private company, Multinational company

Q3: - Where in the World Would You Prefer to Work?

Western USA, Southern USA (includes Texas), Northern USA, Eastern USA, Alaska, Canada, Europe / Great Britain, Asia, Australia, South America, Other (please specify) Middle East

Q4: - If You Want to Work in Texas, Would You Prefer:

Smaller metropolitan area

Q5: - Does the AIPG National Jobs Webpage Provide Adequate Information to Conduct your Search for Employment?

No, it is of little or no help.

Q6: - Do the AIPG Texas Section's Resources Webpages Provide Useful Information in Support for you Finding Employment?

I am providing additional ideas in the Comment Box below:

Other (please specify)

I would like to see AIPG develop a database of national and international engineering geology/groundwater projects that could link engineering companies with qualified engineering geologists or geological teams specializing in geotechnical engineering support. This database could list engineering geologists or companies by specialty or by specialties that can be provided, and could be a clearing house (go-to place) for engineering companies to access. It could also be a place for engineering companies to advertise their employment needs for geologists or their contract needs for geological firms.

Q7: - Do the AIPG Texas Section's Continuing Education Webpages Assist you in Maintaining your Professional License(s)

I am adding additional information via the Comments box below:

Other (please specify)

Not much there for engineering (geotechnical) geologists.

Q8: - Do you have your Professional License to Practice Geoscience in Texas?

Yes

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. For the top three technical areas of interest, the Board will identify available online courses including AIPG courses. For example, a new on-line course of potential interest to geoscientists was recently announced by Rice University. Q8: - Do you have your Professional License to Practice Geoscience in Texas?

No, but do wish to obtain your Texas Professional License to practice geoscience in the State?

Do you wish to receive assistance in preparing for the two qualifying examinations?

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. For the top three technical areas of interest, the Board will identify available online courses including AIPG courses. For example, a new on-line course of potential interest to geoscientists was recently announced by Rice University. If no acceptable online courses are available for the top three technical areas, the Texas AIPG board will consider expanding our on-line search for you or we will look into preparing workshops or webinars to be held in the major centers of our Texas membership, Houston, Dallas, Austin, and San Antonio.

 Time Spent: 00:11:36

PAGE 1: AIPG Texas Section Members:

Q1: - Identify the Top 3 Areas you Would Like to Know More About in order to be More Employable:

Unconventional Hydrocarbon Resources - Distribution and production of oil and gas from shale (fracking) and gas from coal bed methane. Unconventional hydrocarbon deposits are very diverse and difficult to characterize overall, but in general are often lower in resource concentration, dispersed over large areas, and require well stimulation or additional extraction or conversion technology.

Hydrogeology / Groundwater Resource Evaluation - Groundwater quantity and availability issues. Before water resources can be developed and managed, they must be evaluated, i.e., what proportion of those resources can be sustainably exploited for various uses, after setting aside a proportion for environmental or ecological needs. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics to practice in Texas.

Engineering Geology - A combination of geology and geotechnical engineering that is used in structure design and failure analysis issues. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics/Soils to practice in Texas.

Q2: - At What Kind of Entity Would You Prefer to Work?

Small, private company

Q3: - Where in the World Would You Prefer to Work?

Southern USA (includes Texas)

Q4: - If You Want to Work in Texas, Would You Prefer:

Other (please specify)
 Working throughout the state of Texas

Q5: - Does the AIPG National Jobs Webpage Provide Adequate Information to Conduct your Search for Employment?

Other (please specify)
 I have been gainfully employed for 43 years as a geologist and have been sel-employed for more than 20 of those years, but I did refer information from site to a recent graduate. AIPG should be sure every college with a geology program teaches their students to check the AIPG Jobs website and you should be helping every graduate to prepare for the ASBOG Test.

Q6: - Do the AIPG Texas Section's Resources Webpages Provide Useful Information in Support for you Finding Employment?

Other (please specify)
I have not needed to use same.

Q7: - Do the AIPG Texas Section's Continuing Education Webpages Assist you in Maintaining your Professional License(s)

Other (please specify)
I attend a lot of National and annual meetings. But an online annually changing ethics class might be helpful. Just to meet that requirement for various states and organizations.

Q8: - Do you have your Professional License to Practice Geoscience in Texas?

Yes

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. For the top three technical areas of interest, the Board will identify available online courses including AIPG courses. For example, a new on-line course of potential interest to geoscientists was recently announced by Rice University. Q7: - Do the AIPG Texas Section's Continuing Education Webpages Assist you in Maintaining your Professional License(s)

Other (please specify) I have not used this.

Q8: - Do you have your Professional License to Practice Geoscience in Texas?

No, but do wish to obtain your Texas Professional License to practice geoscience in the State?

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. For the top three technical areas of interest, the Board will identify available online courses including AIPG courses. For example, a new on-line course of potential interest to geoscientists was recently announced by Rice University. If no acceptable online courses are available for the top three technical areas, the Texas AIPG board will consider expanding our on-line search for you or we will look into preparing workshops or webinars to be held in the major centers of our Texas membership, Houston, Dallas, Austin, and San Antonio.

PAGE 1: AIPG Texas Section Members:

Q1: - Identify the Top 3 Areas you Would Like to Know More About in order to be More Employable:

Mineral Exploration and Development - Mineral exploration and development are investigative activities prior to mining. They are investments. As such, companies spend money today in the expectation that future revenues will be sufficient to cover all costs including a minimum acceptable profit.

Geological Service Business Ownership and Management - A person or company that pays people to work for them as salaried, contracted or subcontracted employees. Positive attributes include: a strong work ethic, project experience, leadership skills, a risk-taking mentality, a strong desire to survive, a source of cash, an ability to understand markets and develop business, an understanding of budgets and cash flow, familiarity with income statements and balance sheets, effectiveness in finding and retaining good employees, and, if married, a supportive spouse.

Q2: - At What Kind of Entity Would You Prefer to Work?

Small, private company, Multinational company, Other (please specify) Junior exploration company

Q3: - Where in the World Would You Prefer to Work?

Other (please specify) USA, Latin America

Q4: - If You Want to Work in Texas, Would You Prefer:

Major city
 Other (please specify) Not needed

Q5: - Does the AIPG National Jobs Webpage Provide Adequate Information to Conduct your Search for Employment?

Other (please specify) Not needed

Q6: - Do the AIPG Texas Section's Resources Webpages Provide Useful Information in Support for you Finding Employment?

Other (please specify) Not needed

Q7: - Do the AIPG Texas Section's Continuing Education Webpages Assist you in Maintaining your Professional License(s)

Other (please specify) Not needed

Q8: - Do you have your Professional License to Practice Geoscience in Texas?

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. For the top three technical areas of interest, the Board will identify available online courses including AIPG courses. Q1: - Identify the Top 3 Areas you Would Like to Know More About in order to be More Employable:

Petroleum Geology - Principally concerned with the evaluation of seven key elements applicable in the search for hydrocarbons: source, reservoir, seal, trap, timing, maturation and migration.

Geological Service Business Ownership and Management - A person or company that pays people to work for them as salaried, contracted or subcontracted employees. Positive attributes include: a strong work ethic, project experience, leadership skills, a risk-taking mentality, a strong desire to survive, a source of cash, an ability to understand markets and develop business, an understanding of budgets and cash flow, familiarity with income statements and balance sheets, effectiveness in finding and retaining good employees, and, if married, a supportive spouse.

Q2: - At What Kind of Entity Would You Prefer to Work?

Small, private company

Q3: - Where in the World Would You Prefer to Work?

Southern USA (includes Texas)

Q4: - If You Want to Work in Texas, Would You Prefer:

Major city, Smaller metropolitan area, Rural location

Q5: - Does the AIPG National Jobs Webpage Provide Adequate Information to Conduct your Search for Employment?

No, it is of little or no help.

Q6: - Do the AIPG Texas Section's Resources Webpages Provide Useful Information in Support for you Finding Employment?

They are somewhat useful.

Q7: - Do the AIPG Texas Section's Continuing Education Webpages Assist you in Maintaining your Professional License(s)

To Some Extent. I could use additional resources.

Q8: - Do you have your Professional License to Practice Geoscience in Texas?

Yes

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. Q3: - Where in the World Would You Prefer to Work?	Western USA, Southern USA (includes Texas), Europe / Great Britain, South America
Q4: - If You Want to Work in Texas, Would You Prefer:	Smaller metropolitan area
Q5: - Does the AIPG National Jobs Webpage Provide Adequate Information to Conduct your Search for Employment?	<i>Respondent skipped this question</i>
Q6: - Do the AIPG Texas Section's Resources Webpages Provide Useful Information in Support for you Finding Employment?	<i>Respondent skipped this question</i>
Q7: - Do the AIPG Texas Section's Continuing Education Webpages Assist you in Maintaining your Professional License(s)	<i>Respondent skipped this question</i>

Q8: - Do you have your Professional License to Practice Geoscience in Texas? Yes

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. For the top three technical areas of interest, the Board will identify available online courses including AIPG courses. For example, a new on-line course of potential interest to geoscientists was recently announced by Rice University. If no acceptable online courses are available for the top three technical areas, the Texas AIPG board will consider expanding our on-line search for you or we will look into preparing workshops or webinars to be held in the major centers of our Texas membership, Houston, Dallas, Austin, and San Antonio.

Q1: - Identify the Top 3 Areas you Would Like to Know More About in order to be More Employable:

Petroleum Geology - Principally concerned with the evaluation of seven key elements applicable in the search for hydrocarbons: source, reservoir, seal, trap, timing, maturation and migration.

Unconventional Hydrocarbon Resources - Distribution and production of oil and gas from shale (fracking) and gas from coal bed methane. Unconventional hydrocarbon deposits are very diverse and difficult to characterize overall, but in general are often lower in resource concentration, dispersed over large areas, and require well stimulation or additional extraction or conversion technology.

Groundwater Contamination and Remediation - Professionals must understand the physical, chemical, and biological processes that control contaminant transport in groundwater and be able to design plans for stabilization or removal of the contaminant plume. Requires knowledge of applicable regulatory issues. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics to practice in Texas.

Engineering Geology - A combination of geology and geotechnical engineering that is used in structure design and failure analysis issues. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics/Soils to practice in Texas.

Q2: - At What Kind of Entity Would You Prefer to Work?

Respondent skipped this question

Q3: - Where in the World Would You Prefer to Work?

Respondent skipped this question

Q4: - If You Want to Work in Texas, Would You Prefer:

Respondent skipped this question

Q5: - Does the AIPG National Jobs Webpage Provide Adequate Information to Conduct your Search for Employment?

No, it is of little or no help.

Q6: - Do the AIPG Texas Section's Resources Webpages Provide Useful Information in Support for you Finding Employment?

They are somewhat useful.

Q7: - Do the AIPG Texas Section's Continuing Education Webpages Assist you in Maintaining your Professional License(s)

I am adding additional information via the Comments box below:

Other (please specify) Have not used

Q8: - Do you have your Professional License to Practice Geoscience in Texas?

Yes

Q9: - Results of Survey: The Board of AIPG-Texas Section will review and report results to the AIPG Texas Section membership. For the top three technical areas of interest, the Board will identify available online courses including AIPG courses. For example, a new on-line course of potential interest to geoscientists was recently announced by Rice University. Q1: - Identify the Top 3 Areas you Would Like to Know More About in order to be More Employable:

Hydrogeology / Groundwater Resource Evaluation - Groundwater quantity and availability issues. Before water resources can be developed and managed, they must be evaluated, i.e., what proportion of those resources can be sustainably exploited for various uses, after setting aside a proportion for environmental or ecological needs. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics to practice in Texas.

Groundwater Contamination and Remediation - Professionals must understand the physical, chemical, and biological processes that control contaminant transport in groundwater and be able to design plans for stabilization or removal of the contaminant plume. Requires knowledge of applicable regulatory issues. Must be licensed in State of Texas as a Professional Geoscientist with specialty in Geology/Geophysics to practice in Texas.

Geological Service Business Ownership and Management - A person or company that pays people to work for them as salaried, contracted or subcontracted employees. Positive attributes include: a strong work ethic, project experience, leadership skills, a risk-taking mentality, a strong desire to survive, a source of cash, an ability to understand markets and develop business, an understanding of budgets and cash flow, familiarity with income statements and balance sheets, effectiveness in finding and retaining good employees, and, if married, a supportive spouse.

Q2: - At What Kind of Entity Would You Prefer to Work?

Government services ,

Non -profit / non-governmental organization ,

Academia - college, high school, grade school

Q3: - Where in the World Would You Prefer to Work?

Western USA, Canada, Europe / Great Britain ,

Australia
